

# LOGAN

## Residential Sound Insulation Program

### What is the Purpose:

- To help mitigate noise impacts for homes located within the Day-Night Level (DNL) 65 dB contour
- Reduce the interior noise level of eligible properties through installation of acoustically rated products and other treatments

### Who is Eligible:

- Property that is located within the approved project area
- Home was sound insulated prior to 1993
- Home has never been sound insulated by Massport and was built before 1998
- Home passes an acoustical test within interior noise level above 45 DNL

### What does the Program Include

- Replacement of windows
- Replacement of doors
- Addition and/or replacement of caulking and weather stripping
- Installation of central air-conditioning or ventilation systems where none exist

### Project Area:

- *See the reverse side*
